# Covid -19 India

Team : C-19
Team Leader: Anuj Kumar Pandey

Description

This App helps to get the instant info on COVID-19 pandemic.

We can get info of states, safety tips plus helpline is given also global tracker and much more.

Problem

Rate of Corona spread is increasing day by day throughout world.

We still do not have a proper cure for this.

Solution

To slow down corona we must not panic and stay hygienic.

We can prevent it by taking right step at right time by an app or news etc.

How to Stay Safe

Safety Tips

Increase immunity

Increase immunity by doing Yoga, Eat more fermented foods or take a probiotic supplement, Get enough sleep etc..

Why? People can help their immune systems by washing their hands regularly to prevent infections, eating nutritious foods, getting plenty of exercise, getting enough sleep, and getting regular medical checkups.

Ways to host the project on the localhost.

➔ **Clone my project from GitHub.**

➔ **Than install flutter sdk and project dependencies written in pubspec.yaml.**

➔ **Open the current directory in the terminal and run "flutter run", to install it on emulator or a real device.**

➔ **I have also added the apk file for testing. Install it and please take a look.**
